

Finnpartnership

Matchmaking Service

for companies looking for Finnish business partners

Finnpartnership's mission is to increase commercial cooperation between Finland and developing countries. One of the main services provided by Finnpartnership, free of charge, is the **Matchmaking Service**: Matchmaking Service helps companies and other economic actors both in Finland and in developing countries to seek out new cooperation opportunities. Finnpartnership channels business partnership initiatives from developing countries to companies in Finland and vice versa. Business partnerships refer to long-term joint activities between companies or other economic actors in Finland and in developing countries, such as joint ventures, importing from developing countries or transfer of technology and know-how from Finland to developing countries.
