

COMBINATION DATA TO IMPORT INTO MEXICO

Merchandise / product: Polished rice (except for sowing)

Botanical Name: *Oryza sativa*

Country of origin: Vietnam

Use: human consumption and/ or industrial

Country of precedence: Vietnam

I/ Phytosanitary measures:

1. - Phytosanitary Certificate issued by the phytosanitary authority
2. - The Phytosanitary Certificate must state that the product is original from provinces in the **Mekong Delta Region, Vietnam**.

3. - The grain must be packed in new Polypropylene bag (PP bag), sealed with a weight not exceeding 50 kg (ready for sale). The bags should be identified with the product name, origin and if considered the brand which will be marketed to consumers.

II/ The phytosanitary certificate should specify that:

2.1 Rice is free from following insects (12 kinds):

Alphitobius diaperinus, *Alphitobius laevigatus*, *Callosobruchus chinensis*, *Corcyra cephalonica*, *Dinoderus minutus*, *Latheticus oryzae*, *Lophocateres pusillus*, *Palorus foveicollis*, *Palorus ratzeburgi*, *Palorus subdepressus*, *Setomorpha rutella*, *Tenebroides mauritanicus*.

2.2 Rice is free from other different seeds and grain.

III/ The Phytosanitary certificate should specify that the product was treated in origin (Vietnam) PRIOR TO PACKAGING with the following process:

Treatment TFA aluminum phosphate in tablets or pellets at normal atmospheric pressure:

TEMPERATURE	DOSAGE (g/m3)	PERIOD OF EXPOSURE (days)	
		TABLETS	PELLETS
< 5°	No fumigate	No fumigate	No fumigate
5°C - 12 °C	1 a 3.0	10	8
12° C - 15°C	1 a 3.0	5	4
16°C - 20°C	1 a 3.0	4	3
>20°C	1 a 3.0	3	2

IV/ At the point of entry to Mexico must implement one of the following phytosanitary treatments:

4.1 Treatment T302 (d1): methyl bromide

Treatment 302 (d1): methyl bromide to normal atmospheric pressure on camera or in plastic cover, reading the 12 hours is the minimum concentration to be expected during the fumigation process, whose total exposure time of 24 hours, minimum

TEMPERATURE	DOSES	CONCENTRATION (g/m3) AFTER READING:		
	(g/m3)	0.5 Hrs.	2.0 Hrs.	12 Hrs.
32°C or higher	40	30	20	15
27°C - 31°C	56	42	30	20
21°C - 26°C	72	54	40	25
16°C - 20°C	96	72	50	30
10°C - 15°C	120	90	60	35
4°C - 9°C	144	108	70	40

4.2 Treatment T302 (d2): Methyl bromide

Treatment T302 (d2): Methyl bromide in the chamber at 660 mm vacuum.

TEMPERATURE	DOSE (g/m3)	PERIOD OF EXPOSURE (Hrs.)
16°C o mayor	128	3
4 - 15°C	144	3

V/ Take the sample, for sending to a laboratory approved with the responsibility of person concerned, for diagnosis of plant protection (in Mexico):

5.1.- Entomology;

5.2 - Weeds;

5.3 - The plant products and by-products of importation must be free of soil.
